A company maintains employee information in a single table where each employee may report to another employee acting as their manager. Prepare a report that displays the details of every employee who supervises at least one other employee. The report should include the manager's employee ID, name, total number of direct reports, and the average age of those reporting employees. The average age should be rounded to the nearest whole number and the final result should be sorted by employee ID.

```
SELECT
    M.EMPLOYEE_ID,
    M.EMPLOYEE_NAME,
    COUNT(E.EMPLOYEE_ID) AS TOTAL_REPORTS,
    ROUND(AVG(E.AGE), 0) AS AVERAGE_AGE
FROM EMPLOYEE M
JOIN EMPLOYEE E
ON M.EMPLOYEE_ID = E.MANAGER_ID
GROUP BY
    M.EMPLOYEE_ID,
    M.EMPLOYEE_NAME
ORDER BY
    M.EMPLOYEE_ID;
